

WHO WE ARE?

Smartcon International Trade & Marketing Ltd. stands at the forefront of supplying premier Turkish-made facade and cladding materials. Established in 2020, it is headquartered in Ankara with a branch in London, ensuring a smooth sourcing experience for clients globally.

HOW CAN WE HELP YOU?

We supply **Turkish - made facade and cladding materials** with a commitment to reliability and focused expertise. We oversee a thorough supply chain process, from order to delivery, ensuring smooth transitions and careful coordination.

Expertise
in Facades,
Ease in
Sourcing

KEY BENEFITS OF CHOOSING US

- **Seamless Delivery Solutions:** Our efficient delivery process brings your building materials right to your chosen location, be it a port, your premises, or directly to a warehouse. Experience convenience and reliability with our expert logistics.

- **Flexible Payment Terms:** With our adaptable payment options, there's no need for full payment upfront. This flexibility in financial planning improves as our business relationship grows, tailored to your specific needs.

- **Quality Assurance with Factory Visits:** Benefit from the option to visit factories in Turkey for a firsthand look at your products. This ensures the highest quality and readiness of your materials.

- **Prompt Documentation and Order Tracking:** Receive all essential documentation quickly for the import and clearance of your goods. We meticulously track your order from start to finish, ensuring a hassle-free process.

- **Accessible and Dedicated to Excellence:** Our team extends support beyond regular business hours, providing assistance and resolving any concerns. Our commitment is to maintain a reliable, enduring partnership with you.

PRODUCTS WE SUPPLY

Smartfiber[®] Fibercement Board is an **a1 fire-rated** composite building panel made up of cement, cellulose and sand used for interior/exterior cladding, drywalls, ventilated façade systems and external walls in regular, prefabricated, LGS and modular buildings.

SmartCPB[®] Cement Particle Board is an **b1 fire-rated** composite building panel made up of cement and wood chips used for interior/exterior cladding, drywalls, ventilated façade systems and external walls in regular, prefabricated, LGS and modular buildings.

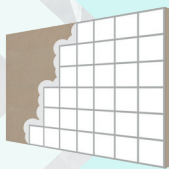

SmartCPBPro[®] Cement Particle Board is an **a2 fire-rated** composite building panel made up of cement and wood chips used for exterior cladding, drywalls, ventilated façade systems and external walls in regular, prefabricated, LGS and modular buildings.

Smartsheath[®] is an innovative, non-combustible exterior sheathing board with an a1 fire rating, suitable for exterior wall systems, ventilated façade systems, backer board applications under various claddings, and beneath ceramic tiling.

SmartGRC[®] Channelled Brick Panel is an **a1 fire-rated** panel, expertly crafted from Glass Reinforced Cement (GRC) used in brick lining that provides ease of application which allows contractors to have reduced labor costs and savings on time.

Smartbacker[®] Tile Backer Board is an **a1 fire-rated** Fibercement Panel, particularly dimensioned and designed to be used in tile backing applications in wet/humid areas.
